

PATENT
450100-4521

IN THE CLAIMS

Please amend claims 1, 4 and 8-11 as follows:

Sub E1

D1

~~1. (Four Times Amended) A transmitter system for transmitting program related information relating to program information, comprising:~~

~~generating means for generating said program related information and display related information relating to displaying said program related information; and~~

~~transmitting means for transmitting said program related information and said display related information separately;~~

~~said generating means composing said program related information and said display related information of a first part including identification information for identifying said program related information and said display related information and a second part composed of actual data;~~

~~whereby said display related information includes information for initiating an operation in response to selection of a displayed item; and~~

~~whereby the displaying of said program related information includes partitioning a display space into at least two boxes, partitioning each of said boxes into at least two cells and displaying said program related information according to said boxes and cells.~~

D2

4. (Four Times Amended) A receiver system for receiving program related information relating to program information, comprising:

PATENT
450100-4521

receiving means for separately receiving said program related information
and display related information relating to displaying said program related information;
and

generating means for generating fourth information for displaying said
program related information based on said program related information and said display
related information;

whereby said display related information includes information for
initiating an operation in response to selection of a displayed item; and

whereby the displaying of said program related information includes
partitioning a display space into at least two boxes, partitioning each of said boxes into at
least two cells and displaying said program related information according to said boxes
and cells.

8. (Four Times Amended) A transmitting method for transmitting
program related information relating to program information, comprising the steps of:

generating said program related information and display related
information relating to displaying said program related information; and

transmitting said program related information and said display related
information separately;

said generating step composing said program related information and said
display related information of a first part including identification information for
identifying said program related information and said display related information and a
second part composed of actual data;

PATENT
450100-4521

whereby said display related information includes information for initiating an operation in response to selection of a displayed item; and

whereby the displaying of said program related information includes partitioning a display space into at least two boxes, partitioning each of said boxes into at least two cells and displaying said program related information according to said boxes and cells.

9. (Four Times Amended) A receiving method for receiving program related information relating to program information, comprising the steps of:

receiving separately said program related information and display related information relating to displaying said program related information; and

generating fourth information for displaying said program related information based on said program related information and said display related information;

whereby said display related information includes information for initiating an operation in response to selection of a displayed item; and

whereby the displaying of said program related information includes partitioning a display space into at least two boxes, partitioning each of said boxes into at least two cells and displaying said program related information according to said boxes and cells.

PATENT
450100-4521

10. (Four Times Amended) A transmission medium for transmitting a computer program for transmitting program related information relating to program information, said computer program comprising the steps of:

generating said program related information and display related information relating to displaying said program related information; and transmitting said program related information and said display related information separately;

said generating step composing said program related information and said display related information of a first part including identification information for identifying said program related information and said display related information and a second part composed of actual data;

whereby said display related information includes information for initiating an operation in response to selection of a displayed item; and

whereby the displaying of said program related information includes partitioning a display space into at least two boxes, partitioning each of said boxes into at least two cells and displaying said program related information according to said boxes and cells.

11. (Four Times Amended) A transmission medium for transmitting a computer program for receiving program related information relating to program information, said computer program comprising the steps of:

receiving separately said program related information and display related information relating to displaying said program related information; and
